Find your balance between food and fun
Fats and sugars — know your limits

Eat Right

1. Make half your grains whole. Choose whole-grain foods, such as whole-wheat bread, oatmeal, brown rice, and lowfat popcorn, more often.

2. Vary your veggies. Go dark green and orange with your vegetables—eat spinach, broccoli, carrots, and sweet potatoes.

3. Focus on fruits. Eat them at meals, and at snack time, too. Choose fresh, frozen, canned, or dried, and go easy on the fruit juice.

4. Get your calcium-rich foods. To build strong bones serve lowfat and fat-free milk and other milk products several times a day.

5. Go lean with protein. Eat lean or lowfat meat, chicken, turkey, and fish. Also, change your tune with more dry beans and peas. Add chick peas, nuts, or seeds to a salad; pinto beans to a burrito; or kidney beans to soup.

6. Change your oil. We all need oil. Get yours from fish, nuts, and liquid oils such as corn, soybean, canola, and olive oil.

7. Don’t sugarcoat it. Choose foods and beverages that do not have sugar and caloric sweeteners as one of the first ingredients. Added sugars contribute calories with few, if any, nutrients.
Be Physically Active Every Day
The person climbing the stairs reminds you to do something active every day, like running, walking the dog, playing, swimming, biking, or climbing lots of stairs.

Choose Healthier Foods From Each Group
Why are the colored stripes wider at the bottom of the pyramid? Every food group has foods that you should eat more often than others; these foods are at the bottom of the pyramid.

Make Choices That Are Right for You
MyPyramid.gov is a Web site that will give everyone in the family personal ideas on how to eat better and exercise more.

Eat More From Some Food Groups Than Others
Did you notice that some of the color stripes are wider than others? The different sizes remind you to choose more foods from the food groups with the widest stripes.

Every Color Every Day
The colors orange, green, red, yellow, blue, and purple represent the five different food groups plus oils. Remember to eat foods from all food groups every day.

Take One Step at a Time
You do not need to change overnight what you eat and how you exercise. Just start with one new, good thing, and add a new one every day.
